RESEARCH EXPERIENCE

- **The Chinese University of Hong Kong, Shenzhen (CUHK-SZ)** Dec. 2025 - Present
Research Assistant (Advisor: Prof. Li Jiang) Shenzhen, China
 - **LIVE (ICML 2026)**: Implemented the cycle-consistency training loop for a Causal DiT, covering forward-rollout scheduling, temporal reversal of frames and controls, reverse-causal masking, and flow-matching loss, and ran training and evaluation on RealEstate10K, UE Engine, and Minecraft beyond the training rollout horizon.
 - **WorldCast (ICLR 2027 submission, first author)**: Led a distributed multiplayer world model using scene-time synchronization, cross-player communication, shared latent memory, and private-view decoding to maintain cross-view consistency under simultaneous actions.
 - **Iso-WAM (ICLR 2027 submission)**: Contributed to a world-action model that isolates action-induced dynamics from visual appearance, aligning learnable query tokens in the action stream with DINOv3 semantic and VGGT geometric latent action targets to improve OOD robustness on LIBERO-Plus and real robots.
