RESEARCH INTERESTS

I work on generative world models that survive contact with action, whether the future is predicted in pixel space or in latent space, along three connected directions:

- **Video Generation:** scalable visual priors that keep appearance, motion, and scene structure coherent over long horizons, and that unify multimodal understanding with generation in a single model.
- **Interactive World Models:** closed-loop simulators that stay stable under self-generated context, respond faithfully to actions, and remain consistent across multiple actors sharing one world.
- **World Action Models:** foundation models that turn predicted futures, pixel-level or latent, into robust embodied control, connecting perception, world dynamics, and action.

EDUCATION

- **Jilin University** Sep. 2023 - Jun. 2027
Bachelor of Engineering in Software Engineering
Changchun, China
 - **GPA:** 88.68/100

PUBLICATIONS

- [S.1] **Ziyang Ye**, Junchao Huang, Evelyn Zhang, Zhihao Xie, Ruicheng Zhang, Boyao Han, Litao Ban, Ziyi Wang, Xinting Hu, Shaoshuai Shi, Zhuotao Tian, Li Jiang. **WorldCast: Distributed Multiplayer World Models**. Under review, *International Conference on Learning Representations (ICLR)*, 2027.
- [S.2] Zhihao Xie, Yuanhao Wang, Jingxin Wang, Yuxin Cheng, **Ziyang Ye**, Haobo Li, Junchao Huang, Junfeng Wu, Xinting Hu, Li Jiang. **Iso-WAM: Rethinking Representation Alignment in World Action Models**. Under review, *International Conference on Learning Representations (ICLR)*, 2027.
- [C.1] Junchao Huang, **Ziyang Ye**, Xinting Hu, Tianyu He, Guiyu Zhang, Shaoshuai Shi, Jiang Bian, Li Jiang. **LIVE: Long-horizon Interactive Video World Modeling**. *International Conference on Machine Learning (ICML)*, 2026.

RESEARCH EXPERIENCE

- **The Chinese University of Hong Kong, Shenzhen (CUHK-SZ)** Dec. 2025 - Present
Research Assistant (Advisor: Prof. Li Jiang) Shenzhen, China
 - **Iso-WAM** (ICLR 2027 submission): Contributed to a world-action model that disentangles physical dynamics from visual appearance by aligning learnable action queries with a unified latent action model fusing semantic and geometric transitions, reaching 98.7% on LIBERO and 75.1% on the OOD LIBERO-Plus benchmark.
 - **WorldCast** (ICLR 2027 submission): Led a distributed multiplayer world model using scene-time synchronization, cross-player communication, shared latent memory, and private-view decoding to maintain cross-view consistency under simultaneous actions.
 - **LIVE** (ICML 2026): Implemented the cycle-consistency training loop for a Causal DiT, covering forward-rollout scheduling, temporal reversal of frames and controls, reverse-causal masking, and flow-matching loss, and ran training and evaluation on RealEstate10K, UE Engine, and Minecraft beyond the training rollout horizon.

INTERNSHIP EXPERIENCE

- **Didi, Voyager AI Research** Jun. 2026 - Present
Intern (Mentor: Shaoshuai Shi) Guangzhou, China
 - Developing Vision-Language-Action (VLA) systems for complex real-robot manipulation tasks.

TECHNICAL SKILLS

- **Programming & Training:** Python, C/C++, PyTorch, Distributed Data Parallel (DDP), Hugging Face Diffusers
- **Generative & World Models:** Diffusion Transformers (DiT), Flow Matching, ControlNet, Wan, FLUX, Interactive Video World Models, World Action Models (Cosmos-Policy, Fast-WAM, Lingbot-VA)
- **Vision, Multimodal & Embodied:** Vision Transformers (ViT, DINO), Vision-Language Models (CLIP, Qwen), 3D Scene Understanding (VGGT/Pi3), Segmentation (SAM), Vision-Language-Action Models (Pi0, OpenVLA)

ACADEMIC SERVICE

- **Reviewer**, International Conference on Learning Representations (ICLR) 2027
